

# Guardall®

## G-410GH • G-410H G-330H

### Professional Camera Enclosures

A professional line of camera enclosures to meet any outdoor installation requirement

Enclosures are very important accessories and for this reason Guardall created a professional durable range with exceptional resistance to extreme weather conditions.

G-410GH is intended for applications employing zoom lenses while model 330H can be used in any other situation, thanks to the small size of Guardall cameras.

If more room for housing any other accessories and cabling is required or if the enclosure of an existing system employing larger cameras is to be replaced, model G-410 is particularly suitable.

The rotating brackets enable its users to perfectly locate the units in the required location.

Guardall's attention to detail makes even simple security products aesthetically pleasing.

- Made of aluminium with glass window
- Removable body to make setup quick and easy
- Sliding sunshade on autolocking runners
- High quality beige coating
- Stand for rotating camera
- Low current heating resistor
- Three different sizes of enclosure
- Rotatable brackets
